Hamilton, ON.

Highlights of Qualifications

- Full-Stack Development Experience:** Skilled in creating and managing UI components with JavaScript, HTML, and CSS, along with back-end development using Node.js, Express, and SQL through personal and course projects.
- Software Testing & Debugging:** Proficient in testing, troubleshooting, and debugging software to ensure smooth user experiences.
- UI Design & Web Development:** Strong knowledge of UI design, along with hands-on experience building and maintaining websites.
- Database Theory Knowledge:** Familiar with relational database concepts, design, and management.
- Problem-Solving & Analytical Skills:** Adept at identifying potential issues and implementing solutions to prevent problems before they arise.
- Multi-OS Proficiency:** Competent in working with multiple operating systems, including Windows and Linux.
- UML & SDLC Concepts:** Experienced in using UML for system design and knowledgeable in all phases of the Software Development Life Cycle (SDLC), including planning, analysis, design, implementation, and maintenance.

Technical Skills

Programming Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL, PHP, HTML

Technologies & Tools: AWS (EC2, DynamoDB, S3, SQS, Lambda, Athena, Elasticsearch), Spark, Hive, Presto, Kubernetes, Docker, Splunk, Kafka, Spring, Angular, ReactJS

Work Experience Software Developer

Ishsoft Technologies - Eldoret, Kenya. April

2023 – DECEMBER 2023

- Designed, developed, and deployed microservices-based web applications using Ruby on Rails and React.
- Collaborated in an Agile environment, releasing updates every sprint and improving application performance by 25% through optimized code.
- Utilized AWS services such as S3 and RDS to manage and scale storage and database solutions for client applications.
- Integrated third-party APIs and implemented automated testing frameworks, enhancing code quality and deployment reliability.

Education

Advanced Diploma in Software Development Mohawk-College —Ongoing

Relevant Coursework: Object-Oriented Programming, Databases, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advanced Data Structures and Algorithms, Information Retrieval

Project Experience

Cloud-Based Financial Tracker

- Developed a full-stack solution using React, Node.js, and PostgreSQL to enable real-time expense tracking and reporting.
- Integrated RESTful APIs and implemented robust authentication mechanisms to ensure data security.

Microservices Architecture for E-Commerce

- Built a modular e-commerce system using Java, Spring Boot, and Kafka to handle asynchronous processing.
- Deployed services on AWS EC2 and implemented a CI/CD pipeline via Azure DevOps to automate deployments.

HTML Validator and Tag Balancer (C#)

- Created a Windows Form App to parse and validate HTML structure.
- Utilized data structures like stacks for efficient tag balancing.

Awards and Certifications

- MICROSOFT AZURE FUNDAMENTALS (AZ-900)
